WELL INVESTIGATION PROGRAM - SITE INSPECTION (FILE NO. 111.2653)

On July 21, 1995, your facility was inspected by staff of this Regional Board. The inspection focused mainly on past and present methods for handling chemicals and wastes at your facility.

Based on our observations and information presented to us, your facility has limited chemical usage (stoddard solvent and cutting oil); therefore, no further action on your part is required at this time with respect to the Well Investigation Program. You are requested to notify this Board of any change in your operations including storage and handling of chemicals or processing and disposal of waste.

Please note that this letter in no way releases you from any chemical and/or waste handling requirements of this or any other agency.

Please contact Joe Luera at (213)266-7588 if you have any questions concerning this matter and address all correspondence to his attention.

HUBERT H. KANG
Senior Water Resource
Control Engineer
